

AERIAL COOLER INSTALLS Strathcona Resources (formerly Osum) Cold Lake, AB

- Civil works
- Pile installation
- Heavy lift
- Structural fabrication & installation
- Process piping fabrication & installation
- Electrical & instrumentation
- Insulation & cladding

Schedule: February - May, 2021

Contract Type: Time & Materials

Contract Value: \$1.5M

Federation was engaged to complete the installation / tie-in of two additional glycol aerial cooler bays and one additional produced gas aerial cooler bay as a part of Strathcona's 2021 heat integration initiatives at their Orion project. Working under a compressed schedule Federation was able to competently execute the concurrent scopes to meet the client tie-in date without incident.
